Response to Amendment

1. Applicant's amendment received on May 20, 2008 has been fully considered and entered, but the arguments are moot in view of the new ground(s) of rejection.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement. Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-6, 8-33 and 35-47 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1, and 8-12 of U.S. Patent Application no. 11/644,855 to Zhu et al.

Although the conflicting claims are not identical, they are not patentably distinct

from each other because the limitations of claims 1, 15, 24, 32, 39 and 44 of the present application are included in the claims 1, and 8-12 of the cited Patent.

Therefore, it is considered obvious that one skilled in the art at the time of the invention having US Patent Application no. 11/644,855 before him/her, would have had no difficulty to modify the conditions and the claim language set in claims 1, and 8-12 of the cited US Patent in order to derive the limitations of claims 1, 15, 24, 32, 39 and 44 of the present application for the same purpose of performing noise filtering in a digital video stream quickly in order to match the frame rate of the digital video stream as taught by Zhu et al.

Claims 2-6, 16-23, 25-31, 33, 35-38, 40-43, 45-47 are rejected by dependency to claims 1, 15, 24, 32, 39 and 44.

NOTE: The applicant is urged to review the claims of all co-pending applications in order to avoid the delay that a terminal disclaimer approval may cause.
